ABOUT THE PROGRAMME

The goal of Faculty Development (FDP) on Innovative Solutions for Smart Cities: Enhancing Mobility and Urban Sustainability is to equip professionals and educators with skills necessary to leverage cutting-edge technologies to propel urban transformation. This Program explores cutting-edge methods to improve urban mobility, including machine learning systems, and the combination of autonomous and electric vehicles. Through an exploration of eco-friendly urban planning, waste management systems, and smart energy solutions, it also tackles sustainability concerns. Through multidisciplinary learning, participants will discover how to use data analysis, artificial intelligence, and the Internet of Things to build sustainable urban ecosystems and smooth, environmentally friendly transportation networks. By enabling educators to convert these ideas into workable plans, the FDP advances the idea of future smarter, greener and more interconnected cities.

REGISTRATION

Participants who would like to attend this program should register online using the link provided below
